DETAILED ACTION

1. Claims 19, 20, 22 and 23 have been canceled. Claims 1-18 and 21 are pending.

Election/Restrictions

2. A national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. Unity of invention is fulfilled only when there is a technical relationship among the inventions involving one or more of the same or corresponding special technical features which define a contribution over the prior art. If there is no special technical feature, if multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application will be considered as the main invention in the claims, see PCT article 17(3) (a) and 1.476 (c), 37 C.F.R. 1.475(d).

The special technical feature of the instant claims is the modulation of E2F activity. As indicated in the International Preliminary Examination Report of PCT/DK98/00245, certain claims are anticipated by WO 98/03652 and WO 97/35975, and therefore the claimed invention as a whole is not novel. Thus, Unity of Invention is found to be lacking.

3. Because the inventions lack Unity of Invention for the reason(s) set forth above, the inventions are held to be distinct. Therefore, restriction for examination purposes as indicated is proper.

4. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

5. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1642

Group I, claim(s) 1-11, drawn to methods for identifying agents affecting the activity of E2F.

Group II, claims 12 and 13, drawn to methods of using agents which modulate the acetylation of E2F to affect transcription, S-phase induction, and apoptosis in cells.

Group III, claims 15, 16, 17 and 21, drawn to agents effecting the activity of E2F.

Group IV, claims 18 and 14, drawn to nucleic acids encoding said agents and the manufacture of pharmaceuticals comprising said nucleic acids.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Canella whose telephone number is (703) 308-8362. The examiner can normally be reached on Monday through Friday from 8:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
